

Eduardo Kawasaki

Hi,

I'm a .NET developer (NOC 2174) from Brazil. I'm 31 years old. I have a fiancée and no kids.

I am currently employed in IT company from São Paulo City Hall. In my position as a developer in a software house I deal with all kinds of programming languages and databases. This allows practicing my curious side of always learning something new.

Currently I'm learning a framework called PhoneGap, to develop mobile apps.

Here is a brief description of my experience:

- 10 years of software development experience (6 years in web application - 4 years in embedded systems);
- Excellent skills in C#, MVC .NET, jQuery, CSS, web services and SQL Server;
- Intermediate experience on HTML5 and responsive pages;
- 6 months in PhoneGap framework, generates a mobile app from a SPA (Single Page Application);

I'm used to work in team and work harder to meet goals and deadlines.

Recently I spent one month in Canada (Apr 2016) visiting Toronto, Niagara, Ottawa and Gatineau to know better the cities and culture.

Feel free to contact me for more information.

My online résumé is available on <http://eykawasaki.github.io>.

Sincerely,

Eduardo Kawasaki

Jun 2016
